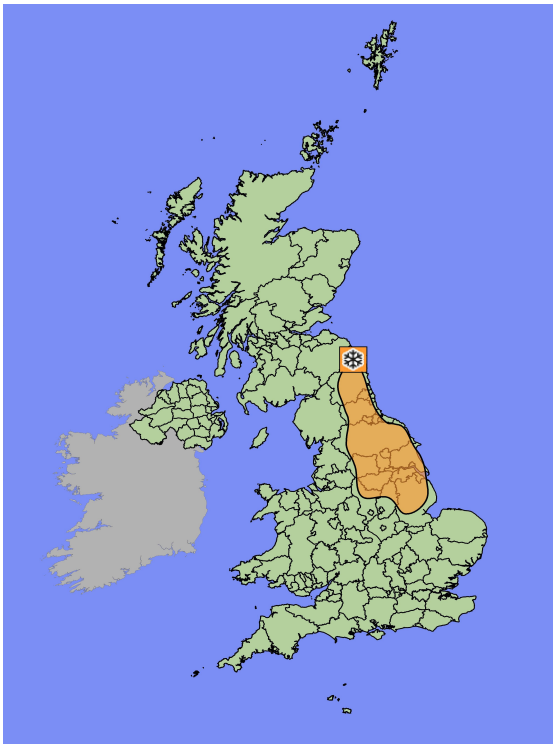
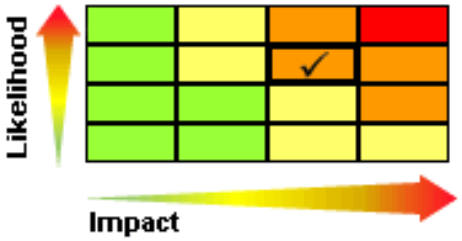
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system will bring a band of sleet and snow, heavy in places, eastwards across the area during Monday morning. This may clear for a time, before returning back westwards across eastern counties during the evening. There remains some uncertainty in the detail of where the largest accumulations of snow will occur, so please monitor for further updates to this warning.

The Met Office have issued an **Amber Warning** of **Snow**

Valid from **09:00 on Mon, 14th Jan 2013** until **23:00 on Mon, 14th Jan 2013**

A band of sleet and snow is expected to move eastwards across the region during Monday morning and early afternoon, clearing from the west through the afternoon, but possibly becoming slow moving over North Sea coastal counties during the evening. Snowfalls of 2-5 cm at low levels and as much as 10 cm above 150 metres are likely to occur, mostly within a 3 to 4 hour period.

The public should be prepared for the risk of disruption, particularly to travel.
